DOE/EIA-0218(85/42) Distribution Category UC-98 **Weekly Coal Energy Information Administration** Washington, D C **Production** Production for Week Ended: October 19, 1985

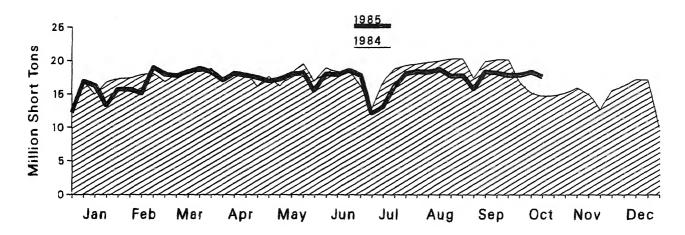

## Highlights

U.S. coal production in the week ended October 19, 1985, as estimated by the Energy Information Administration, totaled 17.53 million tons (bituminous coal and lignite, 17.45 million tons; Pennsylvania anthracite .08 million tons). This was 3.6 percent lower than the previous week, and was 19.8 percent higher than production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through October 19, 1985 was estimated at 715.53 million tons, 3.9 percent below the 744.51 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DDE/EIA-0218(84/40)).
